PROFESSIONAL EXPERIENCE

Accounting Staff | Municipality of Bocaue | Aug 2022-Present

- Reconcile and review municipal and barangay receipt records to support accurate reporting and records integrity.
- Create validation templates and support office technical troubleshooting and workflow improvements.

Family Business Operations | 2019-2022

- Took over operation of the family business.

Chat Support / Accounts and Billing | Concentrix | 2018-2019

Accounting Senior Assistant | Conduent | 2017-2018

Credit Card Specialist / Chat Support | Bank of America | 2013-2014

Data Analyst | Accenture | 2012-2013

TECHNICAL SKILLS

Backend: Python, Django, Django ORM, SQL, MySQL, SQLite

Web and automation: JavaScript, HTML, CSS, REST APIs, Tkinter, openpyxl, Excel

Delivery: Git/GitHub, unittest, integration and regression testing, PyInstaller

PROFESSIONAL SUMMARY

Develops a Django municipal platform and has released a tested Windows utility. Applies accounting experience to data models, approval workflows, and audit controls. Uses AI-assisted development with source review and automated tests.

PERSONAL SOFTWARE PROJECTS

GRAND | Municipal operations and Finance platform | In development

github.com/tepong32/grand | tepong32.github.io/projects/grand

- Design and implement Django applications for citizen assistance, employee leave, reporting, controlled records, QR-based document custody, and asset inventory.
- Develop linked Budget, Accounting, and Treasury workflows for obligations, journal posting, vouchers, and bank reconciliation; separate Finance and operational databases.
- Implement department-scoped permissions, independent approvals, immutable financial history, and source-linked corrections. Integrate inventory with shared identity and access controls.
- Build regression coverage and synthetic transaction replays across Budget, Accounting, Treasury, and reporting. Production rollout and municipal acceptance remain pending.

TraceSync | Python desktop utility | Released v0.11.0

github.com/tepong32/TraceSync | tepong32.github.io/projects/tracesync

- Built a Windows folder synchronization tool with saved folder pairs, copy previews, per-file history, and backup recovery.
- Verified the v0.11.0 release with 159 automated tests; packaged a portable executable with PyInstaller and published its SHA-256 checksum.

EDUCATION AND TRAINING

Technical training and TESDA NC II certifications | 2014-2017

Household electrical wiring and consumer electronics

Bachelor of Science in Business Administration, Management

Bulacan State University | 2007-2011
