

Cristino Agapito Jr

Python / Django Developer • Workflow Systems • Automation
Operations-aware engineering for reliable administrative software

Philippines | cristinoagapitojr@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFILE

Python and Django developer with firsthand experience in local-government accounting, internal audit, customer operations, accounts payable, and data work. Builds backend-heavy workflow software where permissions, lifecycle rules, validation, and audit history matter. Uses AI-assisted development for planning, review, testing, refactoring, and documentation while validating outputs through source review, automated tests, and manual QA.

CORE SKILLS

Backend Python, Django, Django ORM, SQL, service-layer architecture, lifecycle and authorization rules	Web and APIs JavaScript, REST APIs, HTML, accessible UI, Bootstrap, responsive CSS
Automation Tkinter, OpenPyXL, Excel workflows, file processing, PyInstaller packaging	Engineering Git/GitHub, unittest, regression tests, architecture docs, release validation

SELECTED PROJECTS

GRAND - Modular Django LGU Operations Platform | [GitHub](#)

- Owns product direction and full-stack implementation across employee records, leave, public assistance, announcements, departments, and administrative workflows.
- Structures domains as separate Django apps with role-aware access, workflow validation, change history, and explicit unfinished scope; now integrating TracePoint's strongest lifecycle patterns.

TraceSync v0.10.0 - Verified Python Desktop Release | [GitHub](#)

- Released a Windows utility with Saved Folder Pairs, confidence-aware comparison, selective previews, pre-copy metadata revalidation, cancellation, and durable per-file history.
- Maintains 94 automated tests and packages tagged portable builds with PyInstaller and published SHA-256 checksums.

TracePoint - Citizen Assistance Lifecycle Prototype | [GitHub](#)

- Designed secure no-account continuation, centralized request transitions, role-aware staff actions, document review states, and audit-friendly timeline events; standalone work is paused while its lifecycle design moves into GRAND.

API-Driven Portfolio | [Live site](#) | [Source](#)

- Fetches GitHub's REST API once, blends live metadata with curated context, caches successful responses, and handles loading, timeout, retry, rate-limit, empty, and offline states.

PROFESSIONAL EXPERIENCE

Accounting Clerk / Process and Systems Support - Municipality of Bocaue | 2022-Present

- Reconciles and micro-audits municipal and barangay receipt records while supporting reporting accuracy, records integrity, office troubleshooting, validation templates, and workflow improvements.

BPO Operations - Conduent / Concentrix | 2017-2019

- Handled high-volume billing, accounts-payable, and customer cases across chat, phone, and email; built a reusable response flow and ranked in the top 15% for customer satisfaction.

Banking and Data Operations - Accenture / Bank of America | 2012-2014

- Performed claims validation, account servicing, client education, and payment workflow verification under accuracy and service controls.

EDUCATION

Bachelor of Science in Business Administration, Management - Bulacan State University | 2007-2011
